

## **Dimensional Letter Installation**

### **You will need the following items:**

- Masking Tape (Duct Tape for Brick Installs Only)
- Ladder
- Level
- Tape Measure
- Drill + bits

In this box are the letters, studs and a pattern for installation. When ready to install, gather the items above.

**Step 1:** Decide the height and centering you would like to place the sign. Tape one edge of the pattern to the wall and unroll it. Level the entire pattern and tape it securely to the wall.

**Step 2:** Hold drill bits up to stud to determine correct size. Using Drill, drill holes where marked on the pattern and drill 3" deep. Remove pattern when done. Clean the wall/holes using lint cloth, vacuum or compressed air.

**Step 3:** Thread studs into back of letters. Hand Tighten Only! Push letters in holes on the wall per pattern – may need to push in on one edge than the other. Adjust as necessary with drill to make holes larger. Repeat for the remaining letters/logo.

*For inside letter installations, DO NOT USE ADHESIVE. For outdoor installations use a clear silicone on studs, then insert into wall.*
